Inter-VLAN Routing (ACLs)

standard

```
enable
    conf t
      access-list <standard (1-99)|extended  (100-199)> <deny|permit|remark> <ip|any|host>
      access-list 1 deny 192.168.10.0 0.0.0.255

      interface gigabitEthernet 0/0/0.10
          ip access-group 1 in
```

extended

```
enable
    conf t
        access-list 100 <deny|permit|remark> <udp|tcp> <ip|any|host> <mask> <criteria> \
            <protocol|port> <ip|any|host>
        access-list 100 deny tcp 192.168.10.0 0.0.0.255 eq 80
        access-list 100 permit ip any any

        interface gigabitEthernet 0/0/0.10
            i paccess-group 1 in
```
